

2020-05-22 LIPB Meeting Minutes - Attachment A

DRAFT

Proposed amendment to General Design standard

Article 16.4

- A. General Design – Driveways shall be located and designed in profile and grade to afford safe and convenient access to and from public and private ways, and to maintain ~~to~~ and preserve the integrity of adjoining public and private ways. ~~With They should~~ shall have a clear line of sight to and from adjoining public and private ways, with proper erosion controls, so that ~~storm water~~ stormwater runoff or associated debris will not flow into public and private ways or adjacent properties, and with proper measures to prevent damage or erosion to the public and private ways or adjacent properties. ~~As conditions to Driveway Permits applicants will be required to site all driveways and employ all necessary and appropriate construction, erosion and storm-water control and techniques for improvements to these ends. Driveway apron areas connecting with public~~ public ways shall not extend ~~any further~~ into the ~~public way than into the edge of the improved surface of the public way.~~ Driveways shall be designed, constructed and maintained so as to be sufficient to permit the delivery of municipal fire and emergency services.

Changes from Curt's DRAFT

1. Replace "should have" with "shall have" regarding line of sight and erosion and stormwater runoff.
2. At several instances insert "and private" before "way."
3. Clarify that restriction of driveway aprons apply only to public ways.
4. Shorten the restriction on the apron intrusion into a public way.

DRAFT

Proposed amendment to the definition of Driveway

Article 16.2

Driveway – A private or joint or commercial drive, road, field road, paper street, or other avenue used primarily for vehicular travel that runs through any land and that connects or will connect to a public or private way. For purposes of this definition driveways shall also include the apron area where a driveway connects with a public or private way and any associated drainage improvements, including but not limited to drainage ditching and culverts and related structures or other structures or improvements that control or influence storm water runoff.

Changes from Curt's draft

1. At appropriate places insert "or private"
- 2.
