Well and Septic Survey Update

Thank you to all who have already participated in the Well and Septic Survey!

If you haven't had a chance to take the survey, there's still time to submit your responses. You can access the link on the GWQC page on the Town website, the link/ QR code below, or you can pick up a paper copy at Town Hall, complete, and return to Town Hall.

Even if you don't have all the information to complete the survey you are still eligible for a free water test! All you need to do is submit a survey response to be eligible. Please note "I don't know" for any information you don't know and also note your interest in a free water test. The GWQC has the funds to test up to 400 wells, so submit your survey today!

The data collected will be used to:

- Understand the current groundwater quality and quantity constraints on the island
- Help inform regional resilience efforts
- Identify vulnerable areas and actions we can all take to preserve our water supply.
